

Overhead Crane Inspector Training

at Your Facility

All courses at your facility are customized to meet your specific training goals, including subjects, equipment, and certification requirements.

ITI's Overhead Crane Inspector Program is designed to increase the participants' knowledge of inspection requirements for overhead lifting devices which include bridge, gantry, monorail, fixed hoists, and jib wall mounts. The program is based on the OSHA and ASME standards. Classroom workshops are followed by hands-on inspections.

Overhead Crane Inspector Training ■ 4 Day Course

- OSHA/ASME Standards
- Hoist Chain Inspection
- Wire Rope Inspection
- Wire Rope Installation
- Daily, Monthly and Annual Checklists
- Limit Switches
- Brakes
- Hooks
- Structural
- Drive Trains
- Runway
